

# Conducting a Stakeholder Network Analysis

**Leandro Garcia**  
**Centre for Public Health**  
**Queen's University Belfast**  
**[l.garcia@qub.ac.uk](mailto:l.garcia@qub.ac.uk)**

**Workshop – Introduction to Stakeholder Network Analysis : 13 May 2025**

# Overview

COMPLEX SYSTEMS AND NETWORK  
SCIENCE FOR PREVENTION AND CONTROL  
OF NONCOMMUNICABLE DISEASES

*A WHO COLLABORATING CENTRE  
FOR RESEARCH AND TRAINING*

## Objective 1

- Understand the steps involved in conducting a stakeholder network analysis

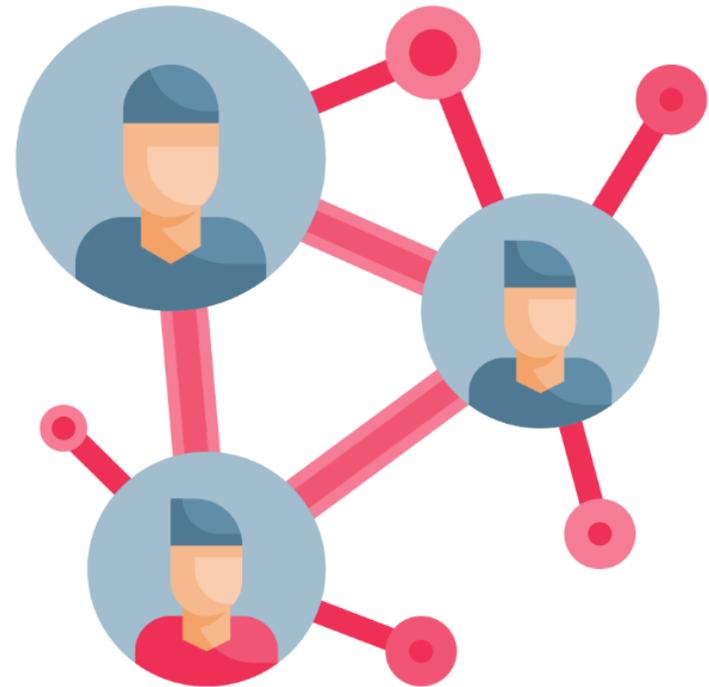

# Stakeholder network analysis

COMPLEX SYSTEMS AND NETWORK  
SCIENCE FOR PREVENTION AND CONTROL  
OF NONCOMMUNICABLE DISEASES

*A WHO COLLABORATING CENTRE  
FOR RESEARCH AND TRAINING*

- There are different tools available to help support the conduct of stakeholder network analysis

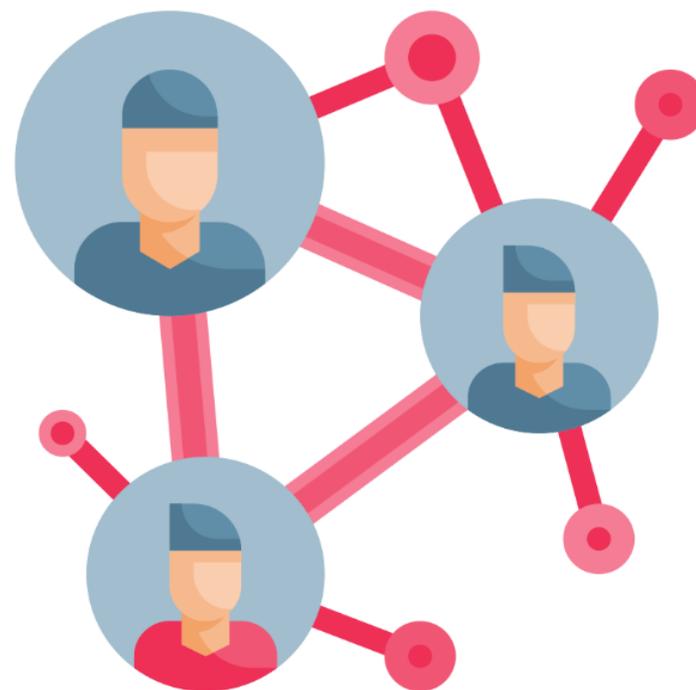

# Stakeholder network analysis

COMPLEX SYSTEMS AND NETWORK  
SCIENCE FOR PREVENTION AND CONTROL  
OF NONCOMMUNICABLE DISEASES

*A WHO COLLABORATING CENTRE  
FOR RESEARCH AND TRAINING*

- While many tools for the **design, data collection** and **data analysis** of stakeholder network surveys exist, they are not always free of charge or covering **all three** of these steps

- Developed by QUB/WHO Collaborating Centre for research and training on complex systems and network science for NCD prevention and control
- Web-based tool
- Created to facilitate the **design, data collection** and **data analysis** of stakeholder network surveys

# Planning a SNA

COMPLEX SYSTEMS AND NETWORK  
SCIENCE FOR PREVENTION AND CONTROL  
OF NONCOMMUNICABLE DISEASES

*A WHO COLLABORATING CENTRE  
FOR RESEARCH AND TRAINING*

**Purpose**

**Identify  
info users**

**Review  
existing  
info**

**What info  
do I want  
to  
collect?**

**Develop a  
timeline**

**Ethics**

# Planning a SNA

COMPLEX SYSTEMS AND NETWORK  
SCIENCE FOR PREVENTION AND CONTROL  
OF NONCOMMUNICABLE DISEASES

*A WHO COLLABORATING CENTRE  
FOR RESEARCH AND TRAINING*

## Purpose

- Important to have a clear focus
- Clarify objectives
- Establish parameters of your SNA
- Identify variables to be measured later in the process

# Planning a SNA

COMPLEX SYSTEMS AND NETWORK  
SCIENCE FOR PREVENTION AND CONTROL  
OF NONCOMMUNICABLE DISEASES

*A WHO COLLABORATING CENTRE  
FOR RESEARCH AND TRAINING*

## Purpose

- Relevant examples of how the StakeholderNet tool can be used:
  - Developing a protocol
  - Providing input for other analyses
  - Informing/updating action plans
  - Providing information to challenge or support policy
  - Guide participatory consensus-building processes

# Planning a SNA

COMPLEX SYSTEMS AND NETWORK  
SCIENCE FOR PREVENTION AND CONTROL  
OF NONCOMMUNICABLE DISEASES

*A WHO COLLABORATING CENTRE  
FOR RESEARCH AND TRAINING*

## Purpose

- Map out issues you are attempting to address
  - Create a list of issues, interests, objectives and desired outcomes
  - Prioritise them
- Consider existing knowledge
  - Identify gaps in evidence base and/or own professional knowledge

# Planning a SNA

COMPLEX SYSTEMS AND NETWORK  
SCIENCE FOR PREVENTION AND CONTROL  
OF NONCOMMUNICABLE DISEASES

*A WHO COLLABORATING CENTRE  
FOR RESEARCH AND TRAINING*

**Identify  
info users**

- The user group will vary
- User group:
  - Primarily - those who will be involved in data collection
  - Secondarily - those who will directly benefit from data collection
- May be useful to establish a working group of these users who can input into protocol, analyses and strategies for data
- Consider users of the information beyond working groups/how they might access data

# Planning a SNA

COMPLEX SYSTEMS AND NETWORK

OF NONCOMMUNICABLE DISEASES

A WHO COLLABORATING CENTRE  
FOR RESEARCH AND TRAINING

## Review existing info

- There may be existing data about the organisations/connections you intend to map
- Understanding what data is in circulation about your target group will help avoid collection of unnecessary/duplicate data
- Identify local sources and inquire about data availability
- These data can supplement or support your SNA (*or render it unnecessary*)

# Planning a SNA

COMPLEX SYSTEMS AND NETWORK  
SCIENCE FOR PREVENTION AND CONTROL  
OF NONCOMMUNICABLE DISEASES

*A WHO COLLABORATING CENTRE  
FOR RESEARCH AND TRAINING*

**What info  
do I want  
to  
collect?**

- Quality over quantity
- Carefully consider information you intend to collect
- How do you plan to put this to use?
- Useful to identify a question or range of sub-questions relating to your objectives

# Planning a SNA

COMPLEX SYSTEMS AND NETWORK  
SCIENCE FOR PREVENTION AND CONTROL  
OF NONCOMMUNICABLE DISEASES

*A WHO COLLABORATING CENTRE  
FOR RESEARCH AND TRAINING*

## Develop a timeline

- A network is dynamic, fluid, temporal
- Relationships are not static
- Consider temporality of the project/network you intend on mapping
- Establish a timeline for the process that is:
  - Realistic
  - Achievable
  - Includes all the major steps for conducting a SNA detailed in the StakeholderNet tool

# Planning a SNA

COMPLEX SYSTEMS AND NETWORK  
SCIENCE FOR PREVENTION AND CONTROL  
OF NONCOMMUNICABLE DISEASES

*A WHO COLLABORATING CENTRE  
FOR RESEARCH AND TRAINING*

## Ethics

- Check ethics protocols and requirements in your organisation
- Generally, any research involving human participants (esp. vulnerable groups) requires robust ethical checks
- SNA involves participants nominating connections/providing data regarding these interactions/relationships – can be off-putting
- Having clearly articulated ethical procedures can reassure participants and enhance response rates
